„My work does not only explore the relationship between the human heart and human facial expressions but also the relationship between man and his environment.

As a multi-versatile artist, my approach to painting has always been spontaneous. I'm interested in the moment because I am compelled to engage the human mind to see the beauty that lies within and to call those things that are not as though they were by employing bold brush strokes that curve into a melodious symphony and rhythm that create soulful meditation for the viewers."
